

Kastalon Mining Industry Solutions

The superior wear and tear resistance of Kastalon polyurethane will outlast traditionally used components by 4-5 times, drastically reducing maintenance.

Mining Industry Component Parts Made to Your Exact Specifications

Save Money with Efficient Manufacturing

We're able to produce both small and medium-sized runs without the high tooling costs of extrusions or castings. Buy direct from the manufacturer and cut out the middle man mark-up.

Replace Steel & Aluminum Parts

Polyurethane components last longer, operate more quietly, and weigh less than metal parts.

Solve Your Application Challenges

Our engineers can work from your specs or reverse engineer a sample to produce a custom part. Whether your design is simple or complex, we can create the parts you need.

Tight Tolerances and Profiles

Kastalon's tight tolerances and specific profiles are done with ease on one of our CNC machines. We are ISO 9001:2015 certified, delivering quality workmanship with each and every part we manufacture.

Meet Your Deadlines

Our dedication to on-time delivering has allowed our customers to increase productivity and reduce downtime.
