METAL PROCESSING SOLUTIONS

THE POWER OF KASTALON POLYURETHANE

ENGINEERED TO 5/7

Our polyurethane is an incredibly resilient, flexible, and durable manufactured material that can take the place of rubber, metal, and wood throughout a metal processing facility.

No other elastomeric material can offer the exceptional wear properties, superior performance and versatility of cast polyurethane.

The benefits are endless...

- Non-marking, non-marring
- Exceptional impact, abrasion, cut and tear resistance
- Superb resilience with excellent elastomeric memory
- Greater load-bearing capabilities;low compression set
- Impervious to most oils and solvents
- Outstanding ozone, oxidation and radiation resistance
- Noise and shock absorbing

Kastalon, Inc. is a premier manufacturer of innovative molded and castable polyurethane. Using rapid engineering technologies and custom chemistries of proprietary compounds, our engineering staff works together with our clients to produce the highest quality products that fit the specific environment and application.

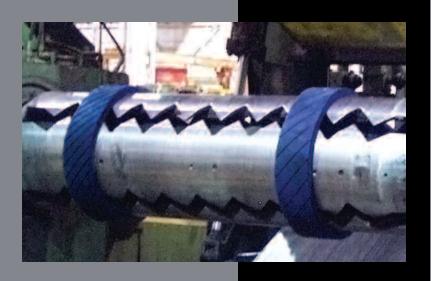

UNCOILER/RECOILER

MANDREL SLEEVES

- Dramatically cuts operating costs
- Makes coil change-out quick & easy
- Virtually eliminates head end breaks and mandrel marks
- Reduces set-up time
- Increases mandrel life between rebuild campaigns

FILLER PLATES

- Will withstand tremendous weight without damage or marking
- Quick change bolt-on adapters
- Light-weight
- Less brittle than nylon
- Wear resistant
- Cost effective

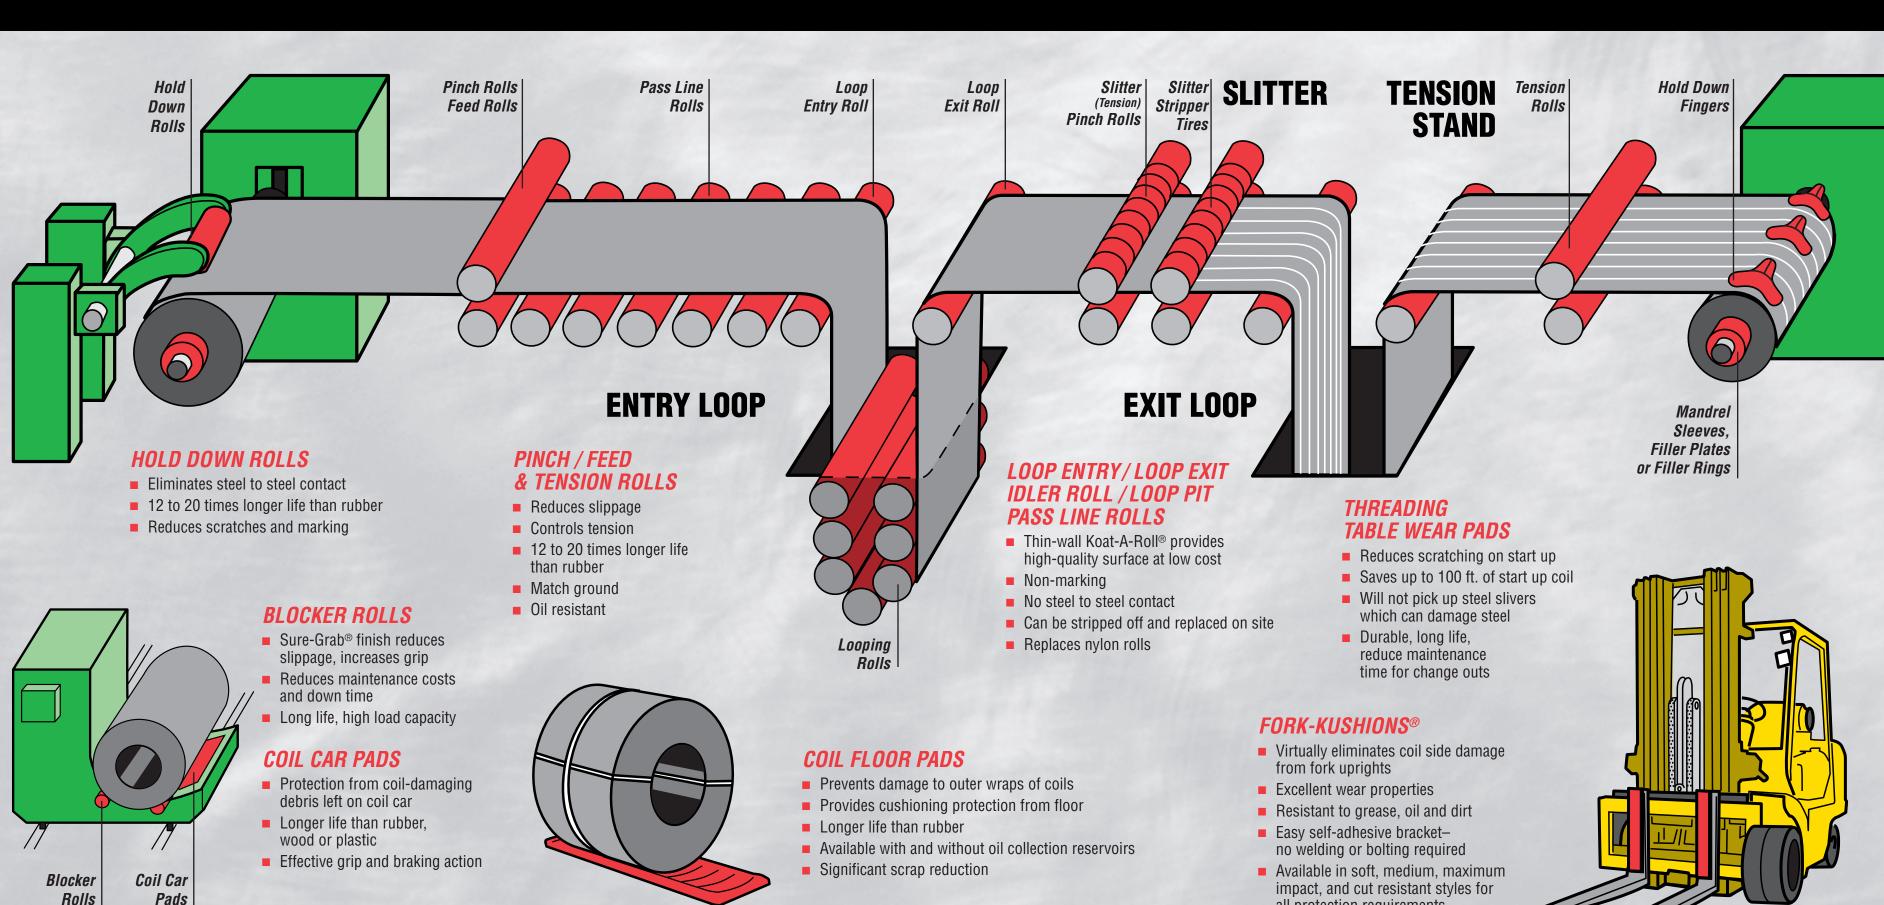

FILLER RINGS

- Eliminates arbor changes
- Quick change, allows continuous run time
- Durable and non-marking
- No maintenance
- Easy handling

METAL PROCESSING SOLUTIONS

FROM BEGINNING TO END

all protection requirements

CRANE BUMPERS

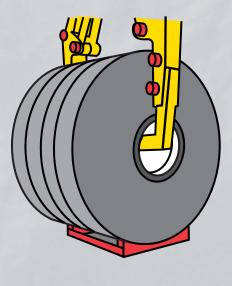

- Extremely effective
- Available in virtually every size and specification
- Less expensive than hydraulic
- No moving parts, no maintenance
- Complies with all safety regulations
- Compact, allows for closer end and side approaches
- Conforms to requirements of OSHA, CMAA, ANSI & AISE

C-HOOK PADS / COIL TONG PADS / ARM BELTS / ARM ROLLERS

- Durable, non-marking
- Prevents eye & side damage from impact with coil
- Easy to install
- No lifting device down time
- Has longer life than other protective pads

COIL-SADDLES™

- Durable, non-marking
- Handles up to 72" diameter coils
- Portable-can use for staging coils at machines or can be permanently bolted to floor for storage
- Available with optional oil collection tray
- Requires no maintenance
